## ➤ **AQUATEC ORCA**

### **Bathe in comfort and safety**

The new **AQUATEC ORCA** is a superior quality, durable bath lifter that has been designed to offer comfort and safety to those who require support and reassurance whilst bathing. The **ORCA's** design incorporates increased leg room, ease of disassembly and an ergonomic, buoyant hand control that contains the lightweight battery. The **AQUATEC ORCA** has an impressive weight limit of 135 kg (21 stone).

**AQUATEC**®

➤ **Stretch out - with increased leg room**

The emphasis on ergonomic design allows the **ORCA** to sit lower and further towards the back of the bath tub, thus allowing increased leg room for deeper and more relaxed bathing. Also, the increased height of the backrest provides full support whilst upright or reclined.

➤ **Compact hand control with battery**

The compact hand control incorporates a lightweight battery which allows approximately 30 lifts per charge\*. It can be easily disconnected to be charged discreetly and safely away from moisture. Raised profile, coloured buttons, with an emergency stop feature allows simple and controlled operation, to give re-assurance and independence. The hand control is supplied with a suction hook, to hold the control whilst not in use, however the hand control will float if dropped into the water.

*\* Dependent on age of battery and weight of client*

➤ **Easy to disassemble 2 piece design**

The backrest has an automatic locking mechanism. When pushed forward the backrest unlocks automatically and folds down with ease. The **ORCA'S** back rest can then be lifted out of the bath with little effort. The large oyster cups release easily to allow the bottom section to be removed from the bath for cleaning. The 2 sections fit neatly into each other to give an extremely compact size for storage.

## Options and Features

### Texturized seating surface

The *ORCA* has a texturized surface to allow use without covers if required. The side flaps are hinged flush to the main seating surface and allow comfortable and safe transfers.

### Non slip cover mats

Cover mats are available in white and blue, and are easily removed for machine washing.

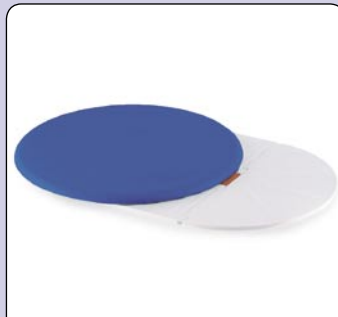

### Safe hand control fitting

The hand control connects to the back of the *ORCA*, providing a secure and completely watertight seal.

### Oyster cups

The oyster cups provide exceptional safety and stability. These extra large suction cups allow the *ORCA* to adhere to steeply curved and textured baths.

### Supported transfers

For those who require increased help and support during transfer. The *TRANS* allows the user to slide onto the seat and swivel into the bath with little effort.

### Transport bag

A sturdy canvas bag with wheels, for discreet transport and safe storage.

### Height adaptors

The *ORCA* can be adapted to suit a full range of bath heights. Height adaptors can be quickly fitted to the base of the bath lifter.

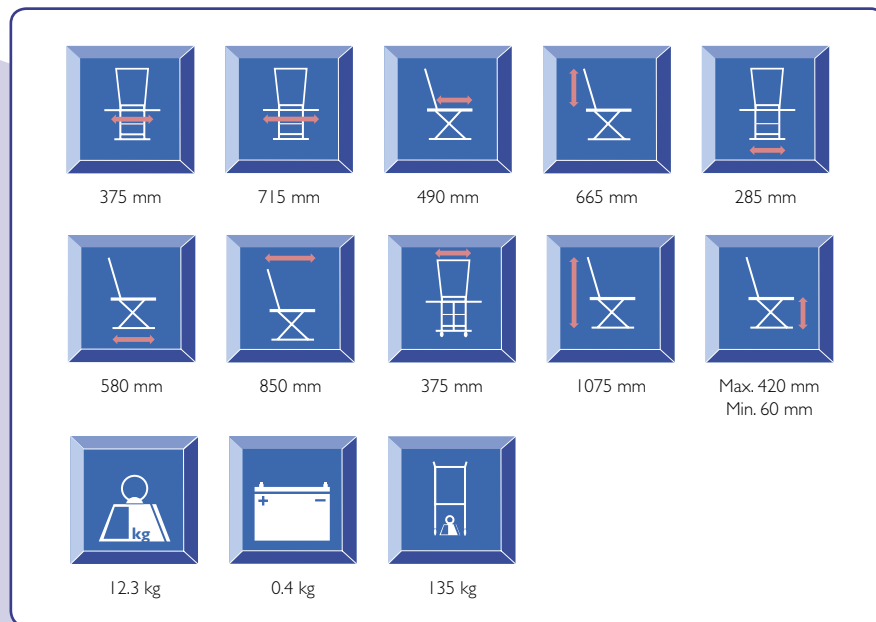

### Refresh kit

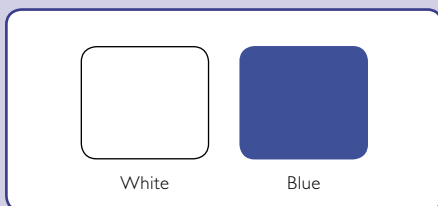

The *ORCA* refresh kit comprises of a full set of covers, oyster cups, side flap diverters and a user guide.
